EDUCATION

University of Colorado Boulder

Master of Science in Data Science

Aug 2023 – Dec 2025

GPA: 3.96/4.0

Mahindra University

Bachelor of Technology in Electrical and Electronics Engineering

Jul 2019 – May 2023

GPA: 3.54/4.0

TECHNICAL SKILLS

Languages: Python (pandas, NumPy, scikit-learn), SQL, R, PySpark

ML & Stats: regression, classification, clustering, time series, A/B testing, predictive modeling

Generative AI: LangChain, RAG, prompt engineering, LLM evaluation, AI agents

Cloud & Data: AWS (Lambda, S3, SQS, DynamoDB, API Gateway), Azure (Data Factory, Databricks), GCP (BigQuery), Snowflake, Docker, Terraform, ETL, Git

Visualization: Tableau, Power BI, Looker, Streamlit

EXPERIENCE

Data Intern – Goodie Bag Food Co., Remote

Jan 2026 – Apr 2026

- Engineered a five-phase market intelligence system covering 86 NYC neighborhoods and 4,141+ shops, automating Google Places ingestion, geospatial catchment analysis, and competitor mapping in Python and replacing weeks of manual research
- Built a composite Market Opportunity Score combining demand, supply, and competitive saturation signals into a single ranked decision framework, enabling the team to evaluate any new launch market in days rather than weeks
- Presented findings directly to the COO, translating analysis of 86 neighborhoods into a specific Brooklyn-first launch recommendation ranked by demand, supply, and competitive saturation

Operations Analyst Intern – Pragmatic Insurance Broking Services, Remote

Jun 2024 – Aug 2024

- Built policy renewal trackers and side-by-side quotation comparison sheets in Excel across insurers, giving the team a clear view of upcoming expirations and cost-versus-coverage tradeoffs to follow up with clients before policies lapsed
- Generated weekly MIS reports on Gross Written Premium, policy issuance, and renewal activity, replacing scattered information with a consistent portfolio view for management, and maintained claim tracking logs to monitor documentation status and speed up resolution

Data Scientist – Intech Insurance Surveyors, Hyderabad India

Jan 2023 – Jun 2023

- Consolidated 5,000+ insurance claim records from multiple branches into a structured dataset via a Python cleaning pipeline (merging, label standardization, deduplication, missing-value handling), replacing a manual assembly process
- Built a claim risk-scoring classification model in Python (Random Forest vs. Logistic Regression baseline), applying SMOTE to address class imbalance and tuning for recall over precision to prioritize catching suspicious claims
- Developed a Power BI dashboard surfacing branch-level claim volume, risk distribution, and loss trends, giving supervisors portfolio visibility that replaced static spreadsheets

PROJECTS

Research Paper Assistant: RAG-Based Document Q&A System

Sep 2025 – Dec 2025

- Built a Retrieval-Augmented Generation pipeline using LangChain, OpenAI embeddings, and a vector store, returning grounded answers to natural-language questions against research papers with source citations
- Tuned chunking, retrieval, and prompt strategies to balance accuracy with latency, then designed evaluation prompts to compare reliability across model variants

Minutes Maker: AI-Powered Meeting Automation Pipeline

Jan 2025 – Apr 2025

- Shipped a production serverless AWS pipeline (Lambda, S3, SQS, DynamoDB, API Gateway) that ingests meeting recordings and produces structured minutes through Faster-Whisper transcription and an LLM-based summarization layer
- Containerized services with Docker, provisioned infrastructure with Terraform, ran CI/CD through GitHub Actions, and deployed a live demo at minutes-maker.streamlit.app for stakeholder testing

LEADERSHIP & AFFILIATIONS

McKinsey Forward Program – Selected for the 2026 global cohort focused on structured problem solving, digital fluency, adaptability, and professional communication.

Graduate Peer Mentor, CU Boulder Graduate School – Mentored incoming graduate students through academic transition and professional development during the 2025-2026 academic year.

Rewriting the Code & Women in Data – Member of global communities supporting women in technology and analytics through mentorship, career resources, and learning events.
