SUMMARY

Recent MS Data Science graduate from CU Boulder with experience working on data pipelines, SQL-based analysis, and building models that support real business decisions. Comfortable working across the full workflow—from cleaning and validating data to building dashboards and communicating insights to stakeholders.

TECHNICAL SKILLS

- Programming:** Python (pandas, NumPy, scikit-learn), SQL, R, PySpark, MATLAB
ML & Deep Learning: TensorFlow/Keras, CNN, LSTM, XGBoost, Random Forest, Classification, Regression, Anomaly Detection, SMOTE, Feature Engineering
Generative & Agentic AI: OpenAI API, RAG Pipelines, LLM Integration, Prompt Engineering, Embeddings
Cloud & Engineering: AWS (Lambda, S3, SQS, ECR, DynamoDB, API Gateway), Azure (Data Factory, Databricks/Spark, Synapse Analytics), BigQuery (GCP), Docker, Terraform, CI/CD (GitHub Actions)
Visualization & BI: Power BI, Tableau, Streamlit, Matplotlib, Seaborn, Excel (Advanced Modeling, Pivot Tables)

EXPERIENCE

- Data Intern** – Goodie Bag Food Co., Remote Jan 2026 – Apr 2026
- Built Python and SQL pipelines integrating transaction, demographic, and geospatial datasets from scratch, developing a **Customer Quality Score** that ranked 20+ NYC neighborhoods by market potential and fed directly into a CEO-level launch decision
 - Designed and maintained **KPI dashboards and performance reports** tracking revenue signals and business metrics, identifying risks and opportunities before they impacted outcomes
 - Collaborated with cross-functional stakeholders to define metrics, align reporting standards, and present findings through structured written and verbal deliverables that shaped the March 2026 NYC market strategy
- Data Analyst Intern** – Pragmatic Insurance Broking Services, Hyderabad India Jun 2024 – Aug 2024
- Analyzed large structured policy and claims datasets using **complex SQL** to identify trends, anomalies, and data quality issues, maintaining audit-ready documentation for compliance and stakeholder review
 - Built and maintained **recurring analytical workflows and reports** enabling consistent, reliable delivery of business insights to internal leadership and external clients
 - Partnered with cross-functional teams to gather requirements, translate business questions into analytical solutions, and communicate findings clearly to both technical and non-technical audiences
- Data Scientist** – Intech Insurance Surveyors, Hyderabad India Jan 2023 – Jun 2023
- Designed and deployed **ML classification and anomaly detection models** (Python, scikit-learn, TensorFlow) on 5,000+ insurance records, applying feature engineering, SMOTE, and threshold calibration to surface actionable risk signals
 - Built **automated reporting workflows** replacing manual processes, improving operational efficiency and enabling faster trend monitoring across surveyor teams
 - Designed **Power BI dashboards** delivering real-time visibility into KPIs, risk metrics, and model outputs for both technical analysts and non-technical leadership

PROJECTS

- Research Paper Assistant – Production LLM/RAG Pipeline** Mar 2025 – May 2025
- Built a **production RAG pipeline** using OpenAI API (gpt-4.1-mini, text-embedding-3-small) and PyMuPDF, implementing cosine similarity retrieval across chunked documents to deliver cited Q&A and structured summaries from complex research papers
 - Designed end-to-end from ingestion to UI, applying **prompt engineering and embedding optimization** to maximize retrieval accuracy and response quality for non-technical users
- Minutes Maker – Serverless AWS AI Pipeline** Aug 2025 – Dec 2025
- Architected a **fully serverless production pipeline** (Lambda, S3, SQS, ECR, DynamoDB, API Gateway) processing audio/video through FFMPEG, Faster-Whisper, and FLAN-T5, containerized with Docker and deployed via Terraform and GitHub Actions CI/CD
 - Implemented **data quality monitoring, exception handling, and audit logging** across all pipeline stages with unit and integration tests ensuring reliable production performance

EDUCATION

- University of Colorado Boulder** Aug 2023 – Dec 2025
Master of Science in Data Science **GPA: 3.96/4.0**
- Mahindra University** Jul 2019 – May 2023
Bachelor of Technology in Electrical and Electronics Engineering **GPA: 3.54/4.0**
